

CMB Temperature Anisotropies (Planck 2018)

Harmonic
Space
Analysis

C^ℓ : CMB Angular Power Spectrum

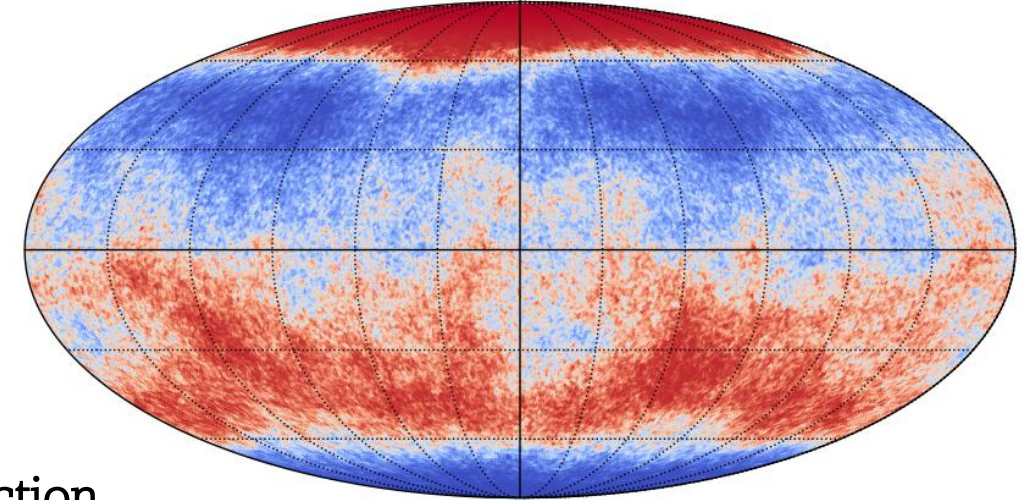

Multipole ℓ

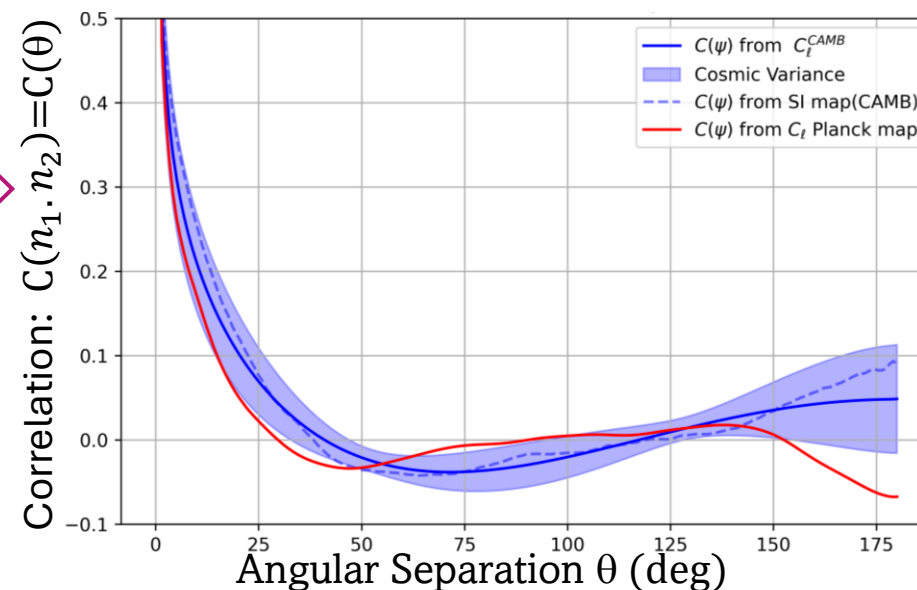

-400 μK 400

Real Space
Analysis

$C(\theta, \phi)$: Anchor-averaged Correlation Map

$C(\theta)$: Two-point Correlation Function

Assumes Statistical
Isotropy in CMB

θ : Polar angle
(separation b/w 2 points)
 ϕ : Azimuthal angle

Dependence on Azimuthal
angle (ϕ) may signal SI
violations!
